OTP C Series
One Time Password Token

OTP c100 — 641966 — ONE TIME PASSWORD

OTP c200 — 595 002 — ONE TIME PASSWORD

FEITIAN — FEITIAN — OTP c300

OTP c200 — 45283438 — ONE TIME PASSWORD

OTP c400 — 880 523

Key Features

- Strong two-factor authentication

- Slim, sleek design with tight seal

- Tough, shock-resistant materials

- Environmental protection against dust and moisture

- Long battery life reduced token replacement costs

- Simple and fast integration into an existing system deployment

- Low costs and high user acceptance brings best ROI

About Feitian

FEITIAN is a trusted leader in the global market for multi-factor Authentication, personal identity, rights management, smart card and mobile smart card reader technology. Established in 1998, FEITIAN has developed as an essential component in the information architecture of private and public enterprise, government, and educational institutions throughout the world. FEITIAN is now known to worldwide countries as a name that stands for confidence, quality and performance. The fountainhead of FEITIAN is firmly rooted in a research and development department comprised of forward thinking experts accounting for more than half of FEITIAN's distinguished multi-national team.

When improving the security on a network or web application on a large scale one of the most important considerations is the end user's technical ability. When it is difficult or impossible to support a large end user base, One Time Password (OTP) is the easy and cost effective way to significantly increase the security of a network or web application.

The C Series of hardware tokens are able to integrate into any Radius or OATH based back end authentication server quickly and easily. Feitian is a contributing member of the Open Authentication Consortium and produces OTP tokens for its customers around the world. Feitian also offers excellent branding and customizations on the token.

OTP c100

- Dimensions: 62 x 29 x 11 (mm)
- High contrast 6-character LCD
- One-button keypad
- Count-down timing bar
- International chip counter
- OATH event (HOTP) based
- 5 years battery life time
- Waterproof
- Environmental protection against dust and moisture

OTP c200

- Dimensions: 60 x 27 x 10 (mm)
- High contrast 8-character LCD
- One-button keypad
- Count-down timing bar
- Inbuilt real-time clock
- OATH time (TOTP) based
- 5 years battery life time
- Environmental protection against dust and moisture

OTP c300

- Compact design in palm size
- High contrast 2-line LCD
- 16-button keypad
- International chip counter
- Inbuilt real-time clock
- OATH challenge-response (OCRA) based
- User PIN protection and active code de-blocking
- 5 years battery life time
- Environmental protection against dust and moisture

OTP c400

- Dimensions: 61.3 x 25 x 11 (mm)
- High contrast 8-character LCD
- One-button keypad
- Inbuilt real-time clock
- Hybrid token featuring with OTP and PKI
- OATH (HOTP/TOTP) based
- PKCS#11 and Microsoft CAPI
- 5 years battery life time
- Environmental protection against dust and moisture

Key Characteristics

- Storage Temperature:
  -20°C~70°C without condensation

- Operating Temperature:
  -10°C~50°C without condensation

- Resistance:
  temper-evidence
  waterproof (IPx8)
  dustproof (IP5x)
  shock-resistance
  vibration-resistance

- CE

- FCC

- RoHS
